

Pin WHEELS

*Admire the majestic
force of the wind and
of your breath as you
look at these beautiful
pinwheels in action!*

Materials:

★ Scissors

★ Hole punch

★ Pipe cleaner

★ Straw

2 Push a **pipe cleaner** through a flexible **straw**. The pipe cleaner should be 2-3 cm longer than the straw.

1 Cut out the 2 **pinwheels** that you'll find at the end of the magazine. Follow the black lines to cut the slats, but don't go all the way to the centre. Use a **hole punch** to make holes in the slats and the one in the centre.

3 Insert the **straw** in the hole in the middle of your pinwheel.

4 Then thread each **slat** through the straw, one after the other. Once they are all in place, gently press on them to fold them a little.

5 Secure the slats by wrapping the **pipe cleaner** around the straw.

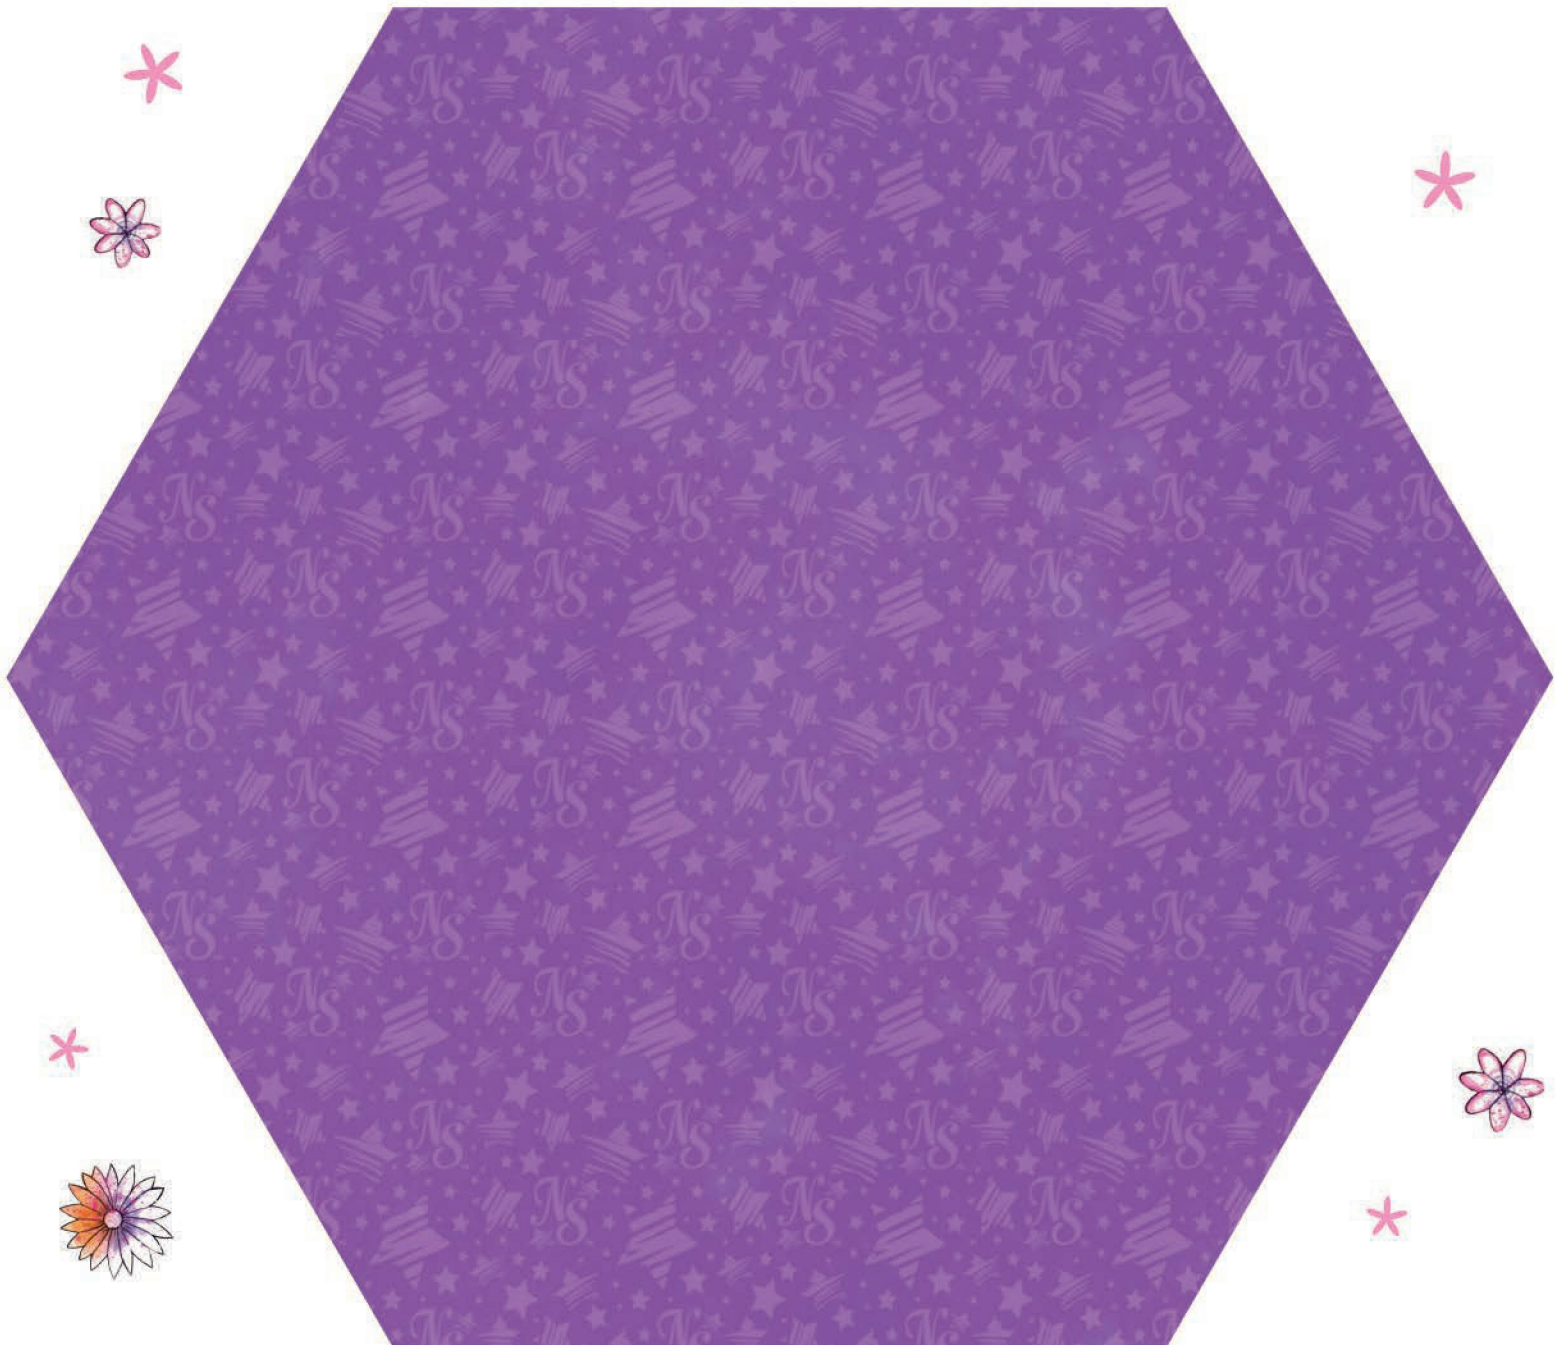

PINWHEELS

TO CUT OUT

Cut out the shape below by following the lines found on the back. For further instructions, refer to pages 46 and 47.

Cut with scissors all the black lines in the shape below.
Be careful not to cut to the centre. Use a hole punch for the round ones.
